

CONTENTS

		Page
Nguyen Dinh Phu Tran Thanh Tung	Existence of solutions of set control differential equations	5
Vo Van On	Einstein's equation in the vector model for gravitational field	15
Chau Van Tao	Designing the software for calculating the equidose lines of the cylindrical surface Gamma sources	27
Huynh Truc Phuong Mai Van Nhon	Application of the standardization K_0 -Inaa method to determine concentrations of the elements Sm and La in the airborne samples with correction of the true-coincidences	35
Vu Dinh Huy Tran Thi Lan Anh	Inhibition of pipeline steel corrosion in alkali and neutral water solutions at different temperatures by sodium molybdate	41
Truong Tich Thien	The softening in plastic deformation of metal	49
Trinh Van Dung	Study about technology applied to manufacture friction – band from cashew nut shell liquid	59
Le Van Viet Man Pham Quoc Chuong	Improvement of fermentation performance in high gravity brewing	66
Nguyen Hoang Viet Tranh Anh Dung Nguyen Quang Thi	Wavelet network in shortterm load forecasting in special days	71
Thiem Quoc Tuan Huynh Ngoc Sang Tran Le The Dien	Studying the mechanism of land subsidence due to the groundwater withdrawal in Hiep Binh Phuoc industrial zone Thu Duc district - Hochiminh city	79
