

# CONTENTS

	Page
<b>1. Effect of waves, tides, and storm parameters on water level rise through numerical simulation</b> Pham Tri Thuc	SI1-SI11
<b>2. Preparation and characterization of bioactive cockle shell aragonite/ gypsum composite as bone cement for bone repair</b> Nguyen Xuan Thanh Tram	SI12-SI17
<b>3. A meshless radial point interpolation method for finite deformation analysis of hyperelasticity</b> Thai Van Vu, Vay Siu Lo, Hien Thai Nguyen, Nha Thanh Nguyen	SI18-SI24
<b>4. Non-linear Behavior Assessment and Fatigue Analysis of Ankle Foot Orthosis by Finite Element Method</b> Thien Tich Truong, Khuong Trieu Nguyen	SI25-SI31
<b>5. A proposal of feed rate setting for high-speed CNC milling machines by the vibration-based method</b> Hung Nguyen-Quoc, Toan Pham-Bao, Luan Vuong-Cong, Nhi Ngo-Kieu	SI32-SI42
<b>6. Finite element analysis for three-dimensional hyper-elastic problems</b> Trong Duc Nguyen, Trong Tran Hieu Huynh, Nha Thanh Nguyen, Hien Thi My Nguyen, Thien Tich Truong	SI43-SI50
<b>7. Interaction of curcumin molecule with fullerene material by simulation method</b> Le Vu Phuc, Lam Toan Vi, Tran Thi Thu Hanh	SI51-SI62
<b>8. Dynamic Analysis of Axially Loaded Beams Partially Supported by an Elastic Foundation Under a Moving Harmonic Load</b> Bui Van Tuyen	SI63-SI71
<b>9. Analysis of the effects of dust particle flow motion on the geometrical parameters of compressor blades in a gas turbine engine</b> Quoc Toan Tran, Huu Binh Le, Ngoc Thanh Huynh	SI72-SI78
<b>9. Insight into the interaction mechanism of thioflavin-t with an amyloid beta (1-42) by the docking method</b> N. Q. Thai, H. Q. Linh	SI79-SI84
